

Factsheet

February 2023

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He/She is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

SIP: Systematic Investment Plan (SIP) works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for a SIP that invests ₹ 500 on every 15th of a month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which an investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds. Some typical benchmarks include the NIFTY, Sensex, BSE200, NSE500, Crisil Liquid Fund Index and 10-Year Gsec.

Entry Load: A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged when an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged when an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99 per unit.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Average Maturity: The average time of maturity of all the debt securities held in a portfolio. It states the weighted average maturity of the assets in the portfolio.

Yield to Maturity (YTM): The Yield to Maturity or the YTM is the rate of return anticipated on a bond is held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Macaulay duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta Ratio (Portfolio Beta): Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is termed an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Total Expense Ratio: Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

Portfolio Turnover Ratio: Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

About the Strategy

Samco AMC's HexaShield Tested Investing

It is a strategy to put to work money with businesses that can endure and survive in a variety of stressful situations and generate superior long-term risk adjusted returns. It relies on understanding the resilience of companies based on Samco's HexaShield framework tests and evaluates every company and institution on 6 most important facets of risks and stress. These tests are meant to measure every company's ability to maintain enough buffer to stay afloat under adverse economic scenarios. The HexaShield tests are also designed to understand if these companies can generate high cash returns on capital employed in a variety of economic conditions including degrowth, recession, etc. This rigorous scientific and statistical process helps get an understanding of risks, reduces room for bias and beliefs, inculcates discipline and enhances the probability of success.

3E Investment Strategy

1. Buy only **Efficient HexaShield Tested Companies**
2. Buy at an **Efficient Price**
3. Maintain an **Efficient Turnover**

The universe of stocks is carefully selected to include efficient companies having an efficient business model purchased at efficient prices and with efficient costs.

How to calculate Active Share?

$$\text{Active Share} = \frac{1}{2} \sum_{i=1}^N |w_{\text{fund},i} - w_{\text{index},i}|$$

Step 1

Data - Constituents of the portfolio with their weights in the scheme portfolio

Step 2

Data - Constituents of the benchmark stocks with their weights in the benchmark

Step 3

Difference of weight in the portfolio and benchmark

Step 4

Make all values of differences as positive

Step 5

Take the sum of the differences

Step 6

Active Share % = The sum value of Step 5 divided by 2

| Stock name | Scheme Portfolio | Scheme Benchmark | Difference | Absolute Difference |
|-------------------------|------------------|------------------|------------|---------------------|
| Stock A | 24% | 39% | -15% | 15% |
| Stock B | 0% | 27% | -27% | 27% |
| Stock C | 27% | 0% | 27% | 27% |
| Stock D | 25% | 34% | -9% | 9% |
| TREPS (Cash equivalent) | 24% | 0% | 24% | 24% |
| Total | 100% | 100% | | 102% |
| Active Share | 51% | | | |

Disclaimer :

We are voluntarily disclosing the Active Share for the schemes of Samco Mutual Fund in the interest of maintaining high transparency to the investors. The information on Active Share should not be construed as a forecast or promise of returns or safeguard of capital. The Investors who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific investor.

Samco Flexi Cap Fund

(An open-ended dynamic equity scheme investing across large cap, mid cap, small cap stocks)

Samco Flexi Cap Fund

(An open-ended dynamic equity scheme investing across large cap, mid cap, small cap stocks)

Portfolio Comment for February 2023

We have deployed 97.59% of our AUM and our asset allocation is 92.11% in Indian Equities, 5.48% in International Equities and 2.41% in TREPS, Cash, Cash Equivalents and Net Current Asset as of February 28, 2023.

At our Fund, we adopt a portfolio management approach that prioritizes quality and longevity. Our focus is on identifying and investing in 25 strong and well-capitalized businesses with solid fundamentals. Even during challenging market conditions, we remain patient and disciplined, avoiding impulsive decision-making and placing our trust in the resilience of our portfolio companies. By maintaining a long-term investment horizon and retaining these businesses in our portfolio, we express our confidence in their ability to generate strong and sustained returns for our unitholders over time. Because we see the ability in these businesses to compound from here onwards, we have not made any change in the portfolio stocks this month.

The top 5 contributors to performance this month were L&T Technology Services, Supreme Industries, LTIMindtree, Bajaj Finance, Aditya Birla Capital. The top 5 detractors to performance were Jubilant Foodworks, Divi's Laboratories, Crompton Greaves Consumer Electricals, J.B.Chemicals and Pharma and Dabur.

Our sectoral weightages have increased in IT Software and Services, Finance and Insurance and Industrial Products while our weightages have reduced in Leisure Services, Pharma and Consumption stocks this month.

Disclosure on Active Share

The Active Share was first introduced by Martijn Cremers and Antti Petajisto, both Yale School of Management professors whose concepts were first published in the Review of Financial Studies 2009 paper titled "How active is your Fund Manager"- A New Measure That Predicts Performance.

Active Share measures the fraction of a portfolio (based on position weights) that differs from the benchmark index. The only way that the equity fund manager can outperform a given benchmark is by taking positions that differ from those in the benchmark. Active Share will always fall between 0% and 100%, where 0% will indicate a truly passive index fund and a higher percentage closer to 100% will show true active management with portfolio stocks diverging from the benchmark.

Disclaimer :

We are voluntarily disclosing the Active Share of Samco Flexi Cap Fund in the interest of maintaining high transparency to the investors.

The information on Active Share should not be construed as a forecast or promise of returns or safeguard of capital. The Investors who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific investor.

Fund Performance

Samco Flexi Cap Fund

| Period | Fund Returns (%) | Benchmark Returns (%) | Additional Benchmark Returns (%) | Value of Investment of 10,000 | | |
|-------------------------------------|------------------|-----------------------|----------------------------------|-------------------------------|---------------|--------------------------|
| | | | | Fund (₹) | Benchmark (₹) | Additional Benchmark (₹) |
| Regular Plan - Growth Option | | | | | | |
| Last 1 year | -8.83% | 2.58% | 4.27% | 9,117 | 10,258 | 10,427 |
| Since Inception | -8.56% | -2.40% | 0.11% | 9,090 | 9,744 | 10,012 |
| Direct Plan - Growth Option | | | | | | |
| Last 1 year | -7.31% | 2.58% | 4.27% | 9,269 | 10,258 | 10,427 |
| Since Inception | -7.05% | -2.40% | 0.11% | 9,250 | 9,744 | 10,012 |

Benchmark: Nifty 500 TRI **Additional Benchmark:** Nifty 50 TRI. **Inception/Allotment date:** 4-Feb-22.

Past performance may or may not be sustained in the future. Returns computed on compounded annualised basis based on the NAV. Different Plans i.e. Regular Plan and Direct Plan under the scheme has different expense structure. The “since inception” returns of the scheme are calculated on Rs. 10/- invested at inception. Mrs. Nirali Bhansali is managing the scheme since inception and Mr. Dhawal Dhanani is dedicated Fund Manager for overseas investments since inception. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

SIP Performance

Samco Flexi Cap Fund

| Period | Amount invested (Rs) | Fund Value (Rs) | Fund Returns (%) | Benchmark value (Rs) | Benchmark Returns (%) | Additional Benchmark Value (Rs) | Additional Benchmark Returns (%) |
|-------------------------------------|----------------------|-----------------|------------------|----------------------|-----------------------|---------------------------------|----------------------------------|
| Regular Plan - Growth Option | | | | | | | |
| Last 1 year | 120,000 | 115,915 | -6.30% | 118,214 | -2.77% | 120,594 | 0.93% |
| Since Inception | 120,000 | 115,915 | -6.30% | 118,214 | -2.77% | 120,594 | 0.93% |
| Direct Plan - Growth Option | | | | | | | |
| Last 1 year | 120,000 | 116,993 | -4.65% | 118,214 | -2.77% | 120,594 | 0.93% |
| Since Inception | 120,000 | 116,993 | -4.65% | 118,214 | -2.77% | 120,594 | 0.93% |

Benchmark: Nifty 500 TRI **Additional Benchmark:** Nifty 50 TRI. **Inception/Allotment date:** 4-Feb-22.

Past performance may or may not be sustained in the future. For SIP returns, monthly investment of Rs.10,000 invested on the 1st business day of every month has been considered. CAGR Returns (%) are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return). Mrs. Nirali Bhansali is managing the scheme since inception and Mr. Dhawal Dhanani is dedicated Fund Manager for overseas investments since inception. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the subsequent date is considered for computation of returns.

Scheme Risk-o-meter **Benchmark Risk-o-meter**

Samco ELSS Tax Saver Fund

(An open-ended Equity Linked Saving Scheme with a statutory lock-in of 3 years and tax benefit.)

Portfolio Comment for February 2023

We have deployed 48.85% of our AUM in Indian Equities and 51.15% in TREPS, Cash, Cash Equivalents and Net Current Asset as of February 28, 2023.

The scheme resumed as an open-ended Fund in the ELSS category in December'2022 and since then we have been accumulating stocks for portfolio construction. The portfolio now consists of 28 businesses and we eventually intend to increase the number of stocks to over 30. Our focus will continue to remain in quality businesses which have passed the HexaShield Framework analysis. The Fund aims to carefully expand its portfolio over the next few months, taking into consideration the fundamentals, valuations, and macros of mid and small cap companies. The primary objective is to invest in growing, well-capitalized businesses with a consistently high Return on Capital Employed.

Our investment strategy revolves around fostering growth for medium and small businesses operating in India. We strongly believe in India's untapped potential and seek to create value for our investors by identifying and supporting businesses with the potential to become major players in the Indian market. Our ultimate objective is to invest in companies that have the potential to attain large-cap status in the future, thereby participating in their growth.

Disclosure on Active Share

The Active Share was first introduced by Martijn Cremers and Antti Petajisto, both Yale School of Management professors whose concepts were first published in the Review of Financial Studies 2009 paper titled "How active is your Fund Manager"- A New Measure That Predicts Performance.

Active Share measures the fraction of a portfolio (based on position weights) that differs from the benchmark index. The only way that the equity fund manager can outperform a given benchmark is by taking positions that differ from those in the benchmark. Active Share will always fall between 0% and 100%, where 0% will indicate a truly passive index fund and a higher percentage closer to 100% will show true active management with portfolio stocks diverging from the benchmark.

Benchmark: CRISIL Overnight Fund AI Index **Additional Benchmark:** CRISIL 1 Year T-Bill Index. **Inception/Allotment date:** 12-Oct-22.

Past performance may or may not be sustained in future. The returns are simple annualized for less than 1 year. Different Plans i.e. Regular Plan and Direct Plan under the scheme has different expense structure. The “since inception” returns of the scheme are calculated on face value of Rs. 1,000 invested at inception. Mr. Dhawal Ghanshyam Dhanani is managing the scheme since inception. In case, the start / end date of the concerned period is a non-business date (NBD), the NAV of the previous date is considered for computation of returns.

Riskometer of the Scheme and the Primary Benchmark
