Investment Strategy

The SAMCO Special Opportunities Fund focuses on generating long-term capital growth by investing in companies experiencing or poised for special situations. These include circumstances like technological disruption, regulatory changes, management restructuring, or prolonged cyclical challenges. The fund targets companies that are either disruptors, enablers, or adaptors of change, as well as those with significant turnaround potential. It leverages inefficiencies in financial markets where the impact of such special situations may be undervalued or overlooked, aiming to capitalize on the resulting mispricing or unanticipated growth potential.

The fund's strategy encompasses a broad spectrum, including digitization, insider mirror trading, spin-offs, reforms, undervalued holding companies, premiumization, sustainable trends, innovation, organized shifts, and new or emerging sectors. This diversified approach seeks to exploit a range of growth opportunities across different sectors and market conditions.

D	Digitization
I	Insider Mirror Trading
S	Spin Offs & Corporate Actions
R	Reforms - Regulatory, Governmental
U	Undervalued Holding Companies
P	Premiumisation
T	Trends sustainable over time
I	Innovation & Technological Disruptions
O	Organised Shift
N	New & Emerging Sectors

Digitization

The Digitization Trend strategy capitalizes on the transformative wave of digital innovation sweeping across industries. This approach involves investing in companies that are either leading the digital revolution or adeptly adapting to it. The focus is on sectors where digitization drives efficiency, opens new markets, and creates novel revenue streams - from cloud computing and e-commerce to fintech and AI-driven technologies. This strategy aims to leverage the accelerated adoption of digital solutions, targeting companies poised to benefit from the shift towards online platforms, digital services, and tech-enabled business models. It also includes a keen interest in businesses that harness data analytics for strategic decision-making and customer engagement. The goal is to identify and invest in companies that are not just surviving but thriving in the digital era, capturing the growth potential presented by this pervasive trend.

Insider Mirror Trading Strategy

This investment strategy focuses on selecting companies that have engaged in share buyback programs or where the company's promoters have increased their stake by purchasing additional shares at market prices. This behavior typically indicates the management's strong belief in the company's future growth potential or its intrinsic value, which may not be fully reflected in the current stock price. The aim of this strategy is to capitalize on the eventual correction of this disparity between the company's true value and its market price, leading to potential gains as the market adjusts and recognizes the company's actual worth.

Spin Offs & Corporate Actions

The Spin Offs & Corporate Actions strategy is predicated on the observation that in conglomerates with diverse business segments, the collective value of these individual units is frequently undervalued when bundled together under a single corporate entity. By executing a de-merger, these distinct businesses can unlock the necessary financial resources and managerial focus, fostering an environment more conducive to growth. This strategy focuses on investing in companies undergoing such spin-offs, providing an opportunity to capitalize on the potential for these now-separate entities to achieve their full growth potential and, consequently, garner appropriate market valuations. Additionally, this approach includes a keen eye on merger opportunities and other corporate actions that can similarly create value and offer attractive investment prospects.

Reforms-Based Strategy

The Reforms-Based Investment Strategy focuses on identifying and capitalizing on opportunities that arise from regulatory, governmental, or other significant reforms. This approach involves investing in companies that stand to benefit from changes in policy, legal frameworks, or government initiatives. For instance, regulatory reforms in sectors like renewable energy, healthcare, or telecommunications can open up new markets or create favorable conditions for certain businesses. Similarly, governmental initiatives in infrastructure or digitalization can accelerate growth in related industries. This strategy requires a keen understanding of the implications of such reforms and the ability to foresee which sectors and companies are likely to gain. The objective is to leverage these reform-induced shifts, investing in entities that are well-positioned to thrive in the evolving regulatory and policy landscape, thereby offering potential for robust returns.

Undervalued HoldCo Strategy

The Holdco strategy targets holding companies that primarily function as group holding entities rather than as strategic investment firms. This operational approach often leads to these companies being persistently undervalued in the market. However, these valuation discounts are not fixed and can fluctuate. The strategy focuses on identifying holding companies with robust underlying businesses that are currently experiencing significant undervaluation, which is expected to improve. This anticipated improvement is often driven by changes in the regulatory environment that prompt action from the

company's promoters. In the interim, this strategy also aims to benefit from the general upward trend in the market, which contributes to narrowing the gap between the company's market value and its intrinsic value.

Premiumization

The Premiumization Trend Strategy is centered on the growing shift towards high-end, branded products among the expanding middle and upper-middle classes in India, as per capita incomes rise. This strategy targets investments in companies that are successfully navigating the balance between offering aspirational, premium products and adhering to the value-for-money ethos deeply ingrained in Indian consumers. It focuses on businesses that excel in creating strong brand identities and position their products effectively at attractive price points. The key is identifying companies that are not just elevating their product offerings but are also adept at tapping into the evolving consumer mindset, where quality, brand reputation, and perceived value play a crucial role in purchase decisions. This approach aims to capitalize on the burgeoning demand for premiumization across various sectors, from consumer goods and electronics to fashion and lifestyle, leveraging the potential for significant growth as consumer trends continue to evolve towards premium consumption.

Trends sustainable over time

The Trends Investment Strategy focuses on identifying and leveraging primary trends that demonstrate resilience and sustainability over both short and long-term cycles within various sectors. This approach involves investing in industries and companies that show consistent patterns of growth, demand, and profitability, regardless of the broader economic cycles. By deeply analyzing market trends, consumer behaviors, and industry dynamics, this strategy aims to pinpoint sectors that are not only thriving in the current economic climate but are also poised for sustained success across different market cycles. Key sectors might include technology, healthcare, consumer staples, or renewable energy, which often exhibit enduring demand and growth potential. The objective is to capitalize on these cyclical trends, targeting investments in companies with strong fundamentals, robust business models, and the ability to adapt and grow through various market conditions, thereby offering potential for stable and continuous returns over time.

Innovation & Technological Disruptions

The Innovation and Technological Disruptions Strategy is predicated on the immense growth potential presented by groundbreaking innovations and the disruptive impact of new technologies. This investment approach zeroes in on companies at the forefront of technological advancement or those adeptly integrating cutting-edge technologies into their business models. The focus is on sectors experiencing rapid transformation due to innovations such as artificial intelligence, blockchain, biotechnology, renewable energy, and next-generation telecommunications. By identifying companies that are either pioneers of these disruptive technologies or are leveraging them to redefine their industries, the strategy aims to capitalize on the significant growth trajectories and market opportunities these innovations create. This approach requires a forward-looking perspective, targeting investments in entities that are not only adapting to technological changes but are leading the charge in reshaping the business landscape for the future. The goal is to harness the potential of these technological disruptions for substantial long-term returns.

Organized Shift

The Shift from Unorganized to Organized Sector Strategy capitalizes on the significant transition occurring in various industries, where reforms like the Goods and Services Tax (GST) in India are catalyzing the movement of businesses from the unorganized to the organized sector. This investment approach focuses on companies that are well-positioned to benefit from this fundamental shift, driven by ongoing and future reforms in tax, labor, and other regulatory frameworks. As these changes encourage more businesses to formalize, organized entities are poised to capture increased market share from their unorganized counterparts. The strategy also considers the ongoing restructuring of supply chains and the formalization of retail trade, which further accelerates this transition. Investments are targeted towards

	<p>companies that demonstrate the ability to adapt their business models and enhance efficiency in this evolving landscape. The objective is to identify and invest in businesses that are not only adapting to these regulatory changes but are also at the forefront of transforming the way business is conducted in India, thus standing to benefit significantly from this shift.</p> <p>New & Emerging Sectors</p> <p>The New and Emerging Sectors Strategy focuses on identifying and capitalizing on the potential of industries that are in their nascent stages of development and remain largely under the radar. This investment approach seeks out sectors that are small, burgeoning, and often overlooked due to their early stage in the growth cycle. The key is to pinpoint industries that are poised for significant expansion and disruption, driven by innovations, changing consumer trends, or unique market needs. Such sectors might include advanced materials, niche technology areas like quantum computing, or emerging health tech segments or new consumer categories. The strategy involves a deep dive into market research and trend analysis to uncover these hidden gems that, while currently small and underexplored, have the potential to grow exponentially and become market leaders in the future. Investments are directed towards companies within these sectors that show promise of scalability, innovation, and the ability to carve out a new market space. The goal is to get in early on these emerging sectors, seizing the opportunity for high growth potential and significant returns as these industries mature and gain mainstream recognition.</p> <p>Though every endeavour will be made to achieve the objectives of the Scheme, the AMC/Sponsor/Trustees do not guarantee that the investment objectives of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.</p>
<p>Risk profile of the scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific Risk Factors are summarized below:</p> <p>Investing in a thematic fund is based on the premise that the Fund will seek to invest in companies belonging to specific sectors/theme. This will limit the capability of the Fund to invest in other opportunities. Special Situations are out of the ordinary situations that companies find themselves in, from time to time. Such situations present an investment opportunity to the Fund Manager who can judge the implications of that opportunity that can unlock value for investors. Such trades are subject to investment style risk; the schemes' performance may not be in line with the general market in scenarios of strong upward or downward cycles. Further, the prices of securities invested by the scheme may not behave as expected by Fund Manager; this may affect the returns of the scheme adversely. The scheme will involve active monitoring and may lead to changes in the portfolio involving both sale and purchase of the existing stocks and purchase of new stocks, if any.</p> <p>Risks associated with investments in Equity and Equity related instruments:</p> <p>Investments in equity and equity related securities involve a degree of risk and investors should not invest in equity schemes unless they afford to take the risk of losing their investment. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Volatility in the capital markets, changes in policies of the Government, taxation laws or any other political and economic development may negatively affect the prices of the securities invested in by the Scheme. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The Scheme may inter-alia also may be exposed to the risk arising from over exposure to few securities/issuers/sectors.</p> <p>Risks associated with Derivatives</p> <p>The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations. The use of derivatives requires an understanding of the underlying instruments and the derivatives themselves. The risk of investments in derivatives includes mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.</p>

Risk Associated with covered call strategy

The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the Scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the Scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

Risks associated with investments in Fixed Income Securities:

The NAV of the Scheme, to the extent invested in fixed income securities, will be affected by changes in the interest rates due to various factors such as government borrowing, inflation, economic performance etc. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. Investments in Fixed Income securities may inter-alia carry Re-investment Risk, Spread Risk, Credit/Default Risk, Liquidity Risk, Prepayment Risk, etc.

Risk associated with investing in Foreign Securities

Subject to necessary regulatory approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances. It is AMC's belief that investment in foreign securities offer new investment and portfolio diversification opportunities into multi-market and multicurrency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme may invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.

Risks associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement

The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

	<p>Risks associated with transaction in Units through stock exchange(s):</p> <p>In respect of transaction in Units of the Scheme through Bombay Stock Exchange (“BSE”) and / or National Stock Exchange (“NSE”), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by NSE and / or BSE and their respective clearing corporations on which the Fund has no control.</p> <p>Risks associated with Restrictions on Redemption:</p> <p>The Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.</p> <p>Risks associated with Segregated portfolio:</p> <p>The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a Credit Rating Agencies (CRA) or actual default of either the interest or principal amount, in case of its unrated debt or money market instruments. Accordingly, Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer. The Security comprises of segregated portfolio may not realise any value.</p> <p>Further, listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</p> <p>Please refer the SID for further details.</p>
<p>Risk Control</p>	<p>Investments in Equity and equity related instruments including derivatives, debt and money market instruments carry various risks such as inability to sell securities, trading volumes and settlement periods, market risk, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigates.</p> <p>Please refer the SID for further details.</p>

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and/or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.
